

Main Screen w/ Message.

Tapping on + icon starts a right-to-left modal.

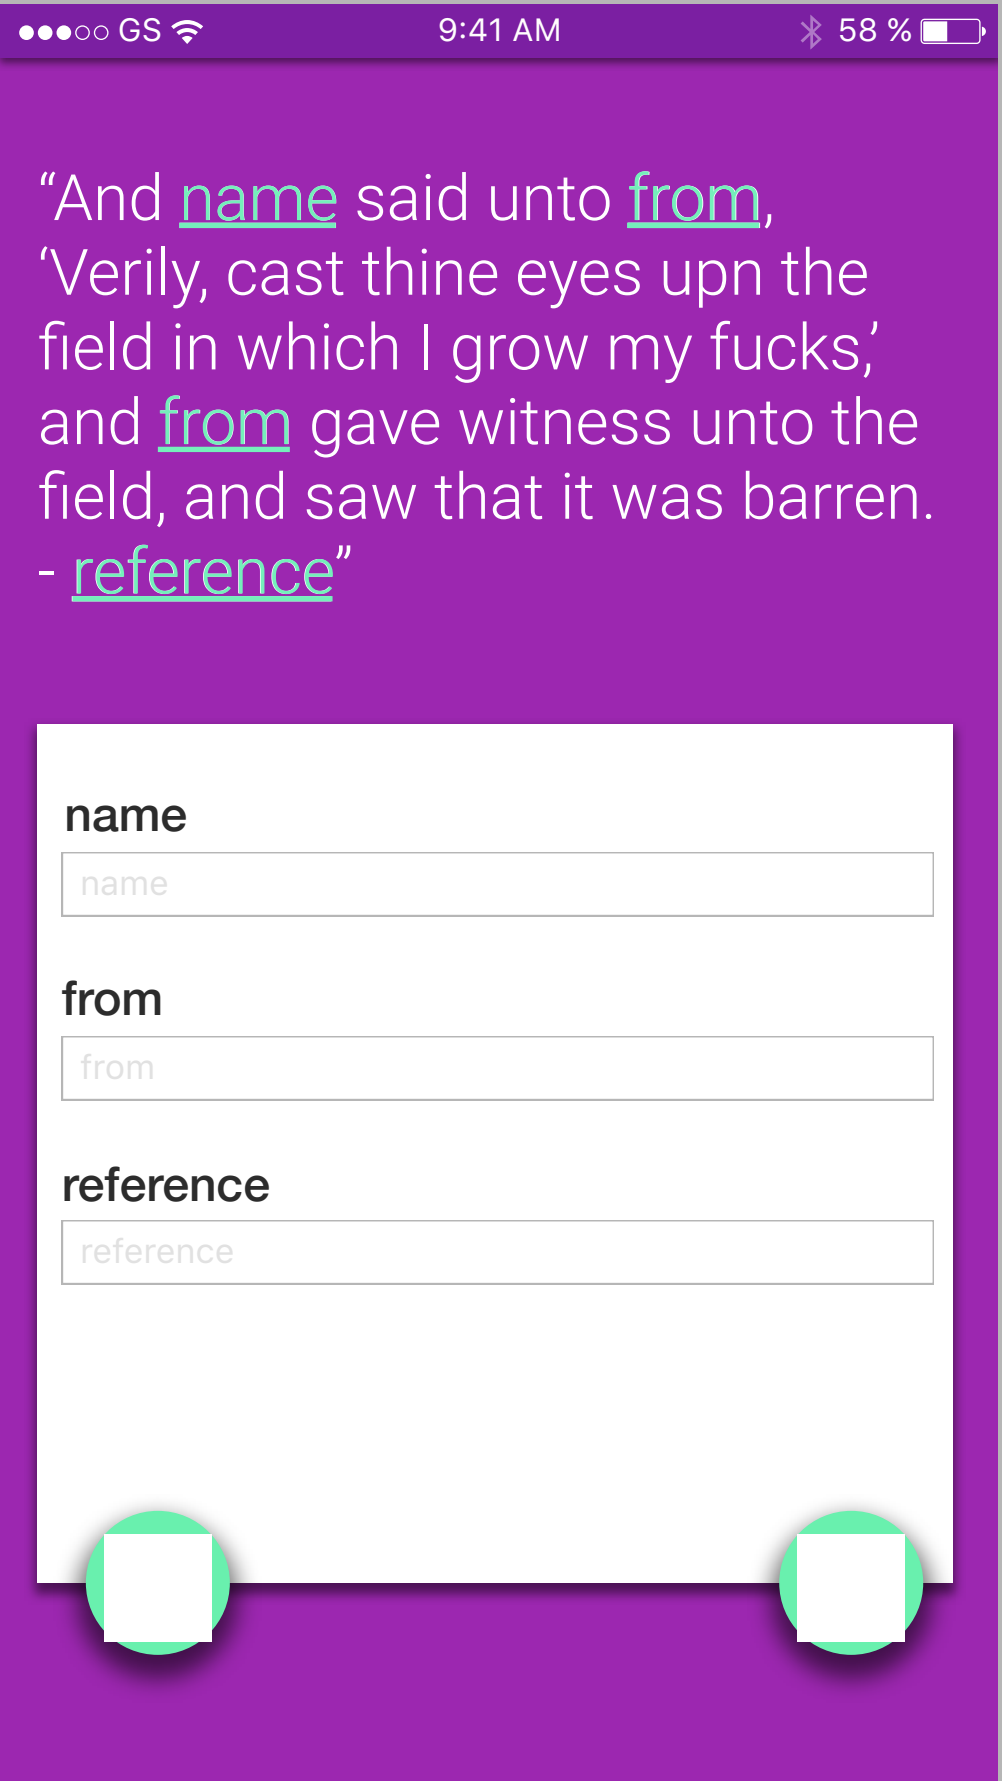

Tapping the caret OR a swipe gesture from the bottom-to-top opens the Settings Menu

Showing list of Operations.

Selecting a cell pushes to view the FoaasOperation of that name.

"X" pops back to Main Screen w/ a left-to-right modal

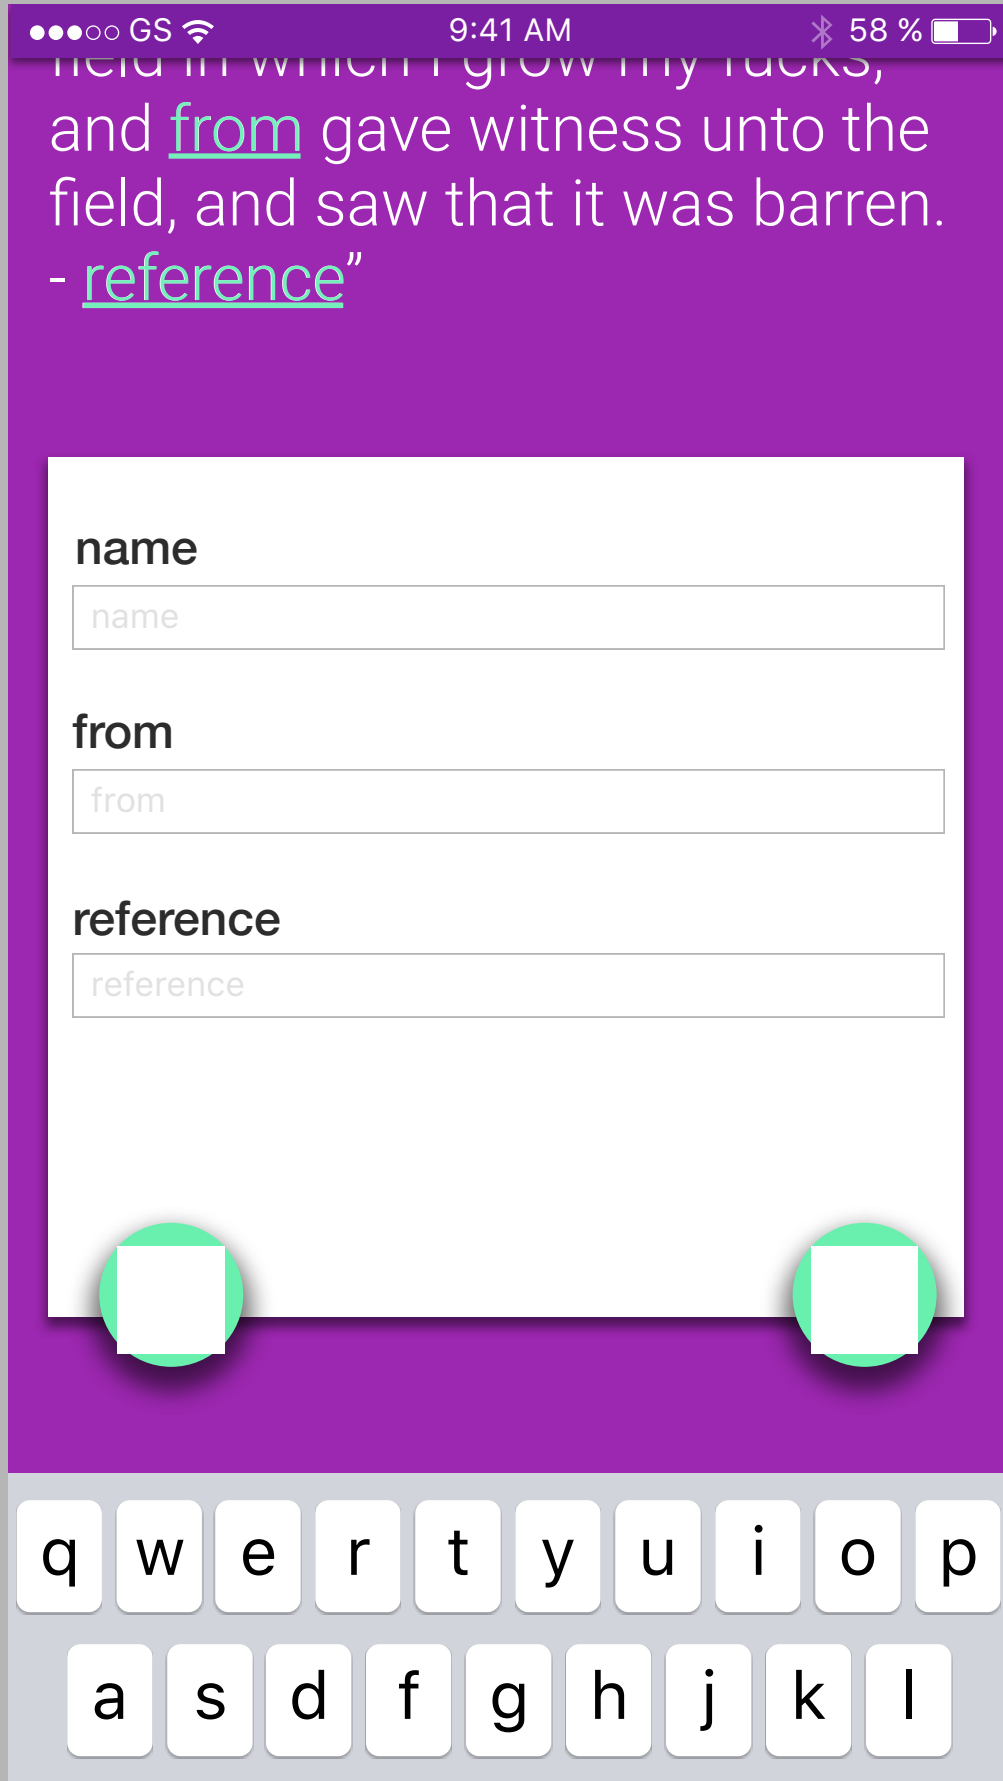

Preview View.

Preview window at the top displays the message along with placeholder values.

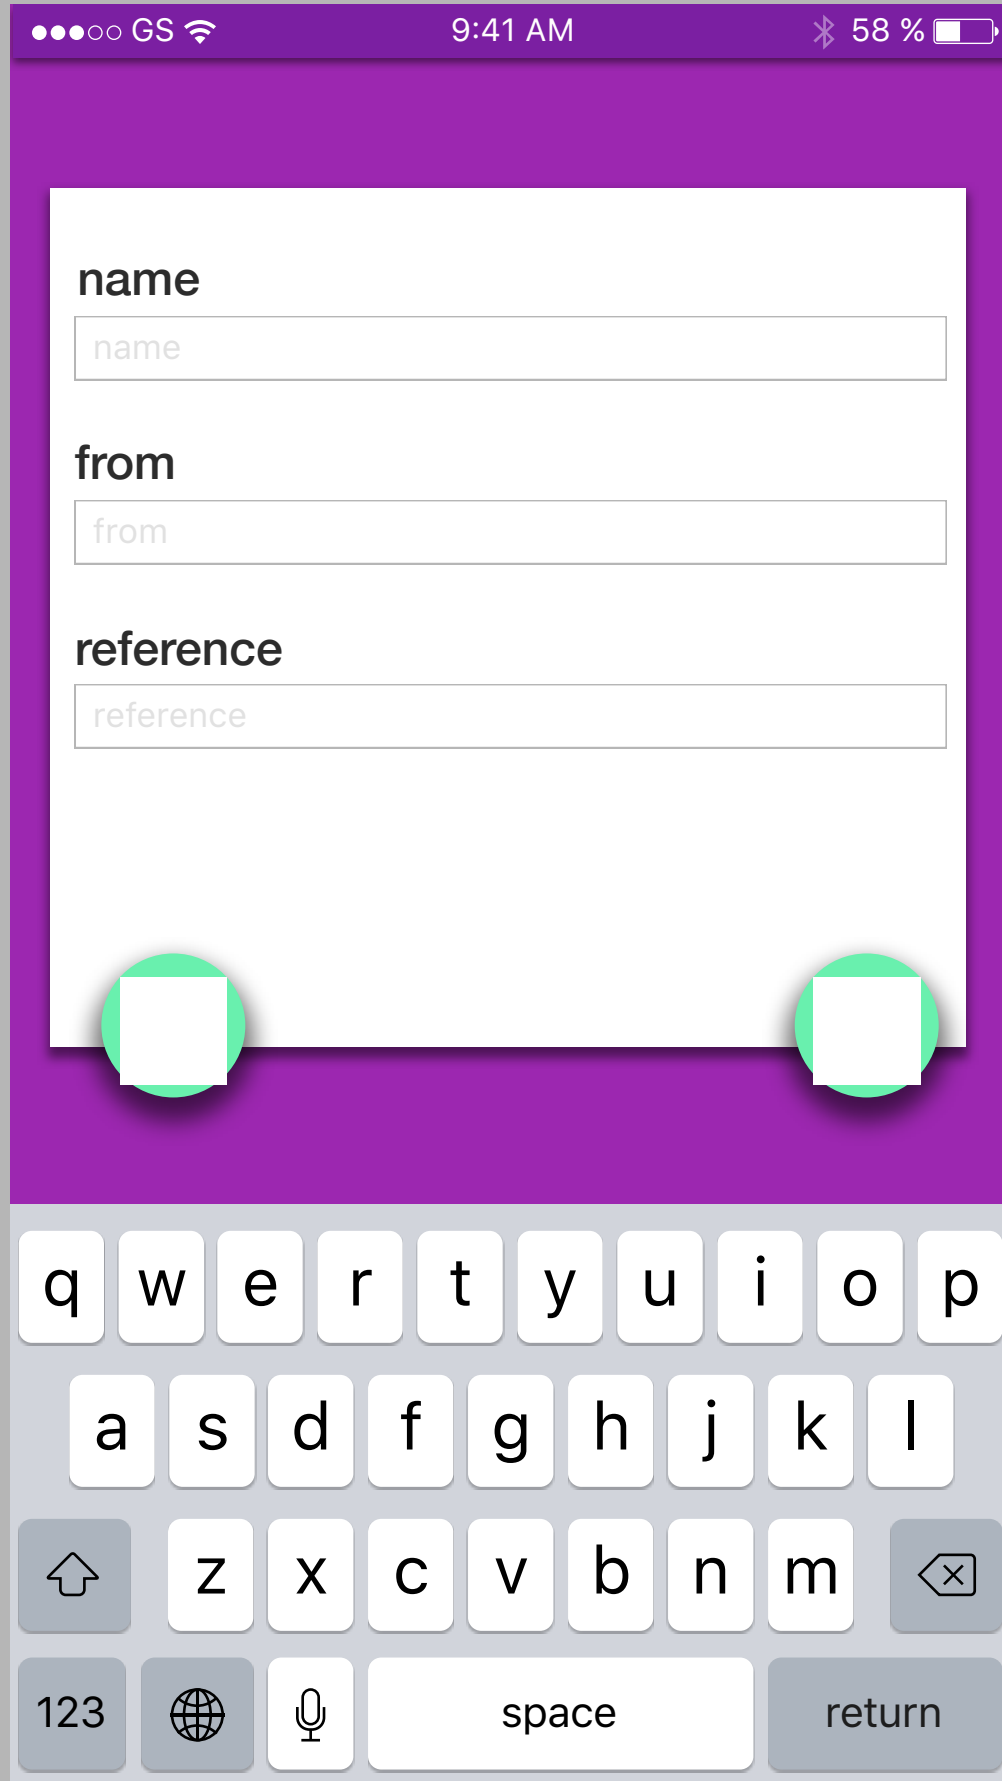

Entering corresponding values in text fields below updates the placeholders in the preview text field.

Checkmark confirms selection, back arrow returns to list of Operations

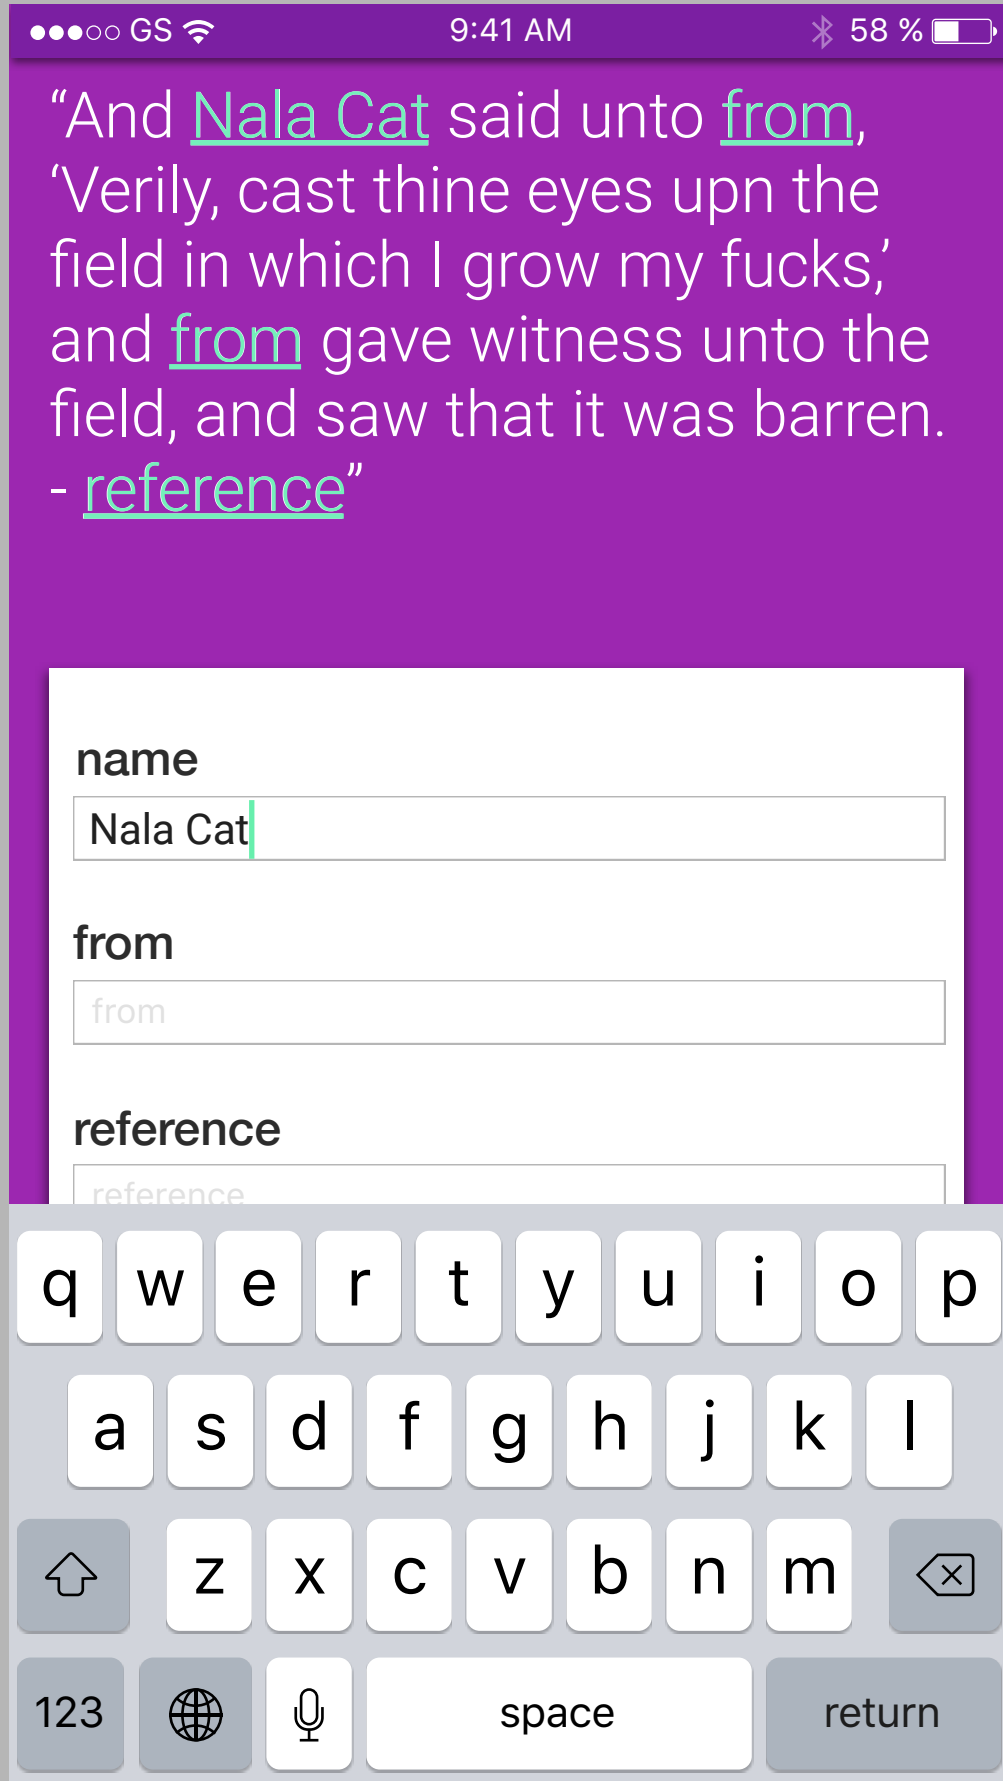

Keyboard animation in progress

Preview screen pushes content up, including floating buttons

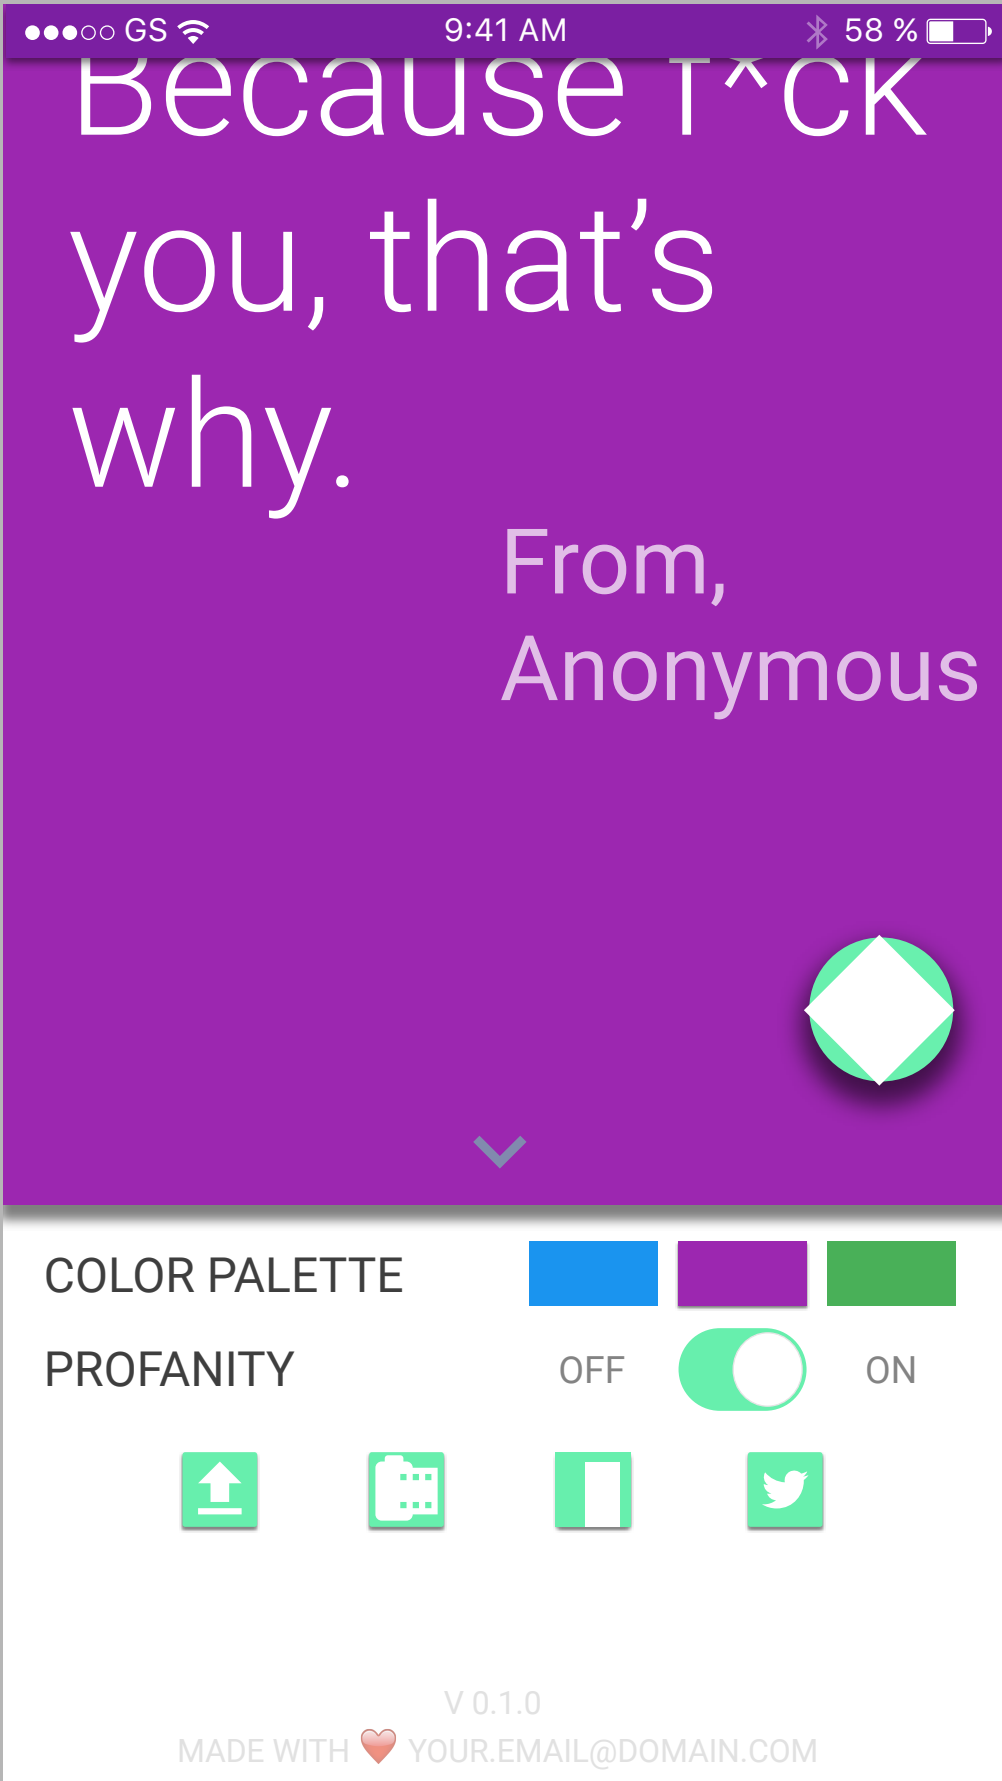

Keyboard fully extended.

Keyboard fully extended.

You should be able to scroll back up even if the keyboard is visible

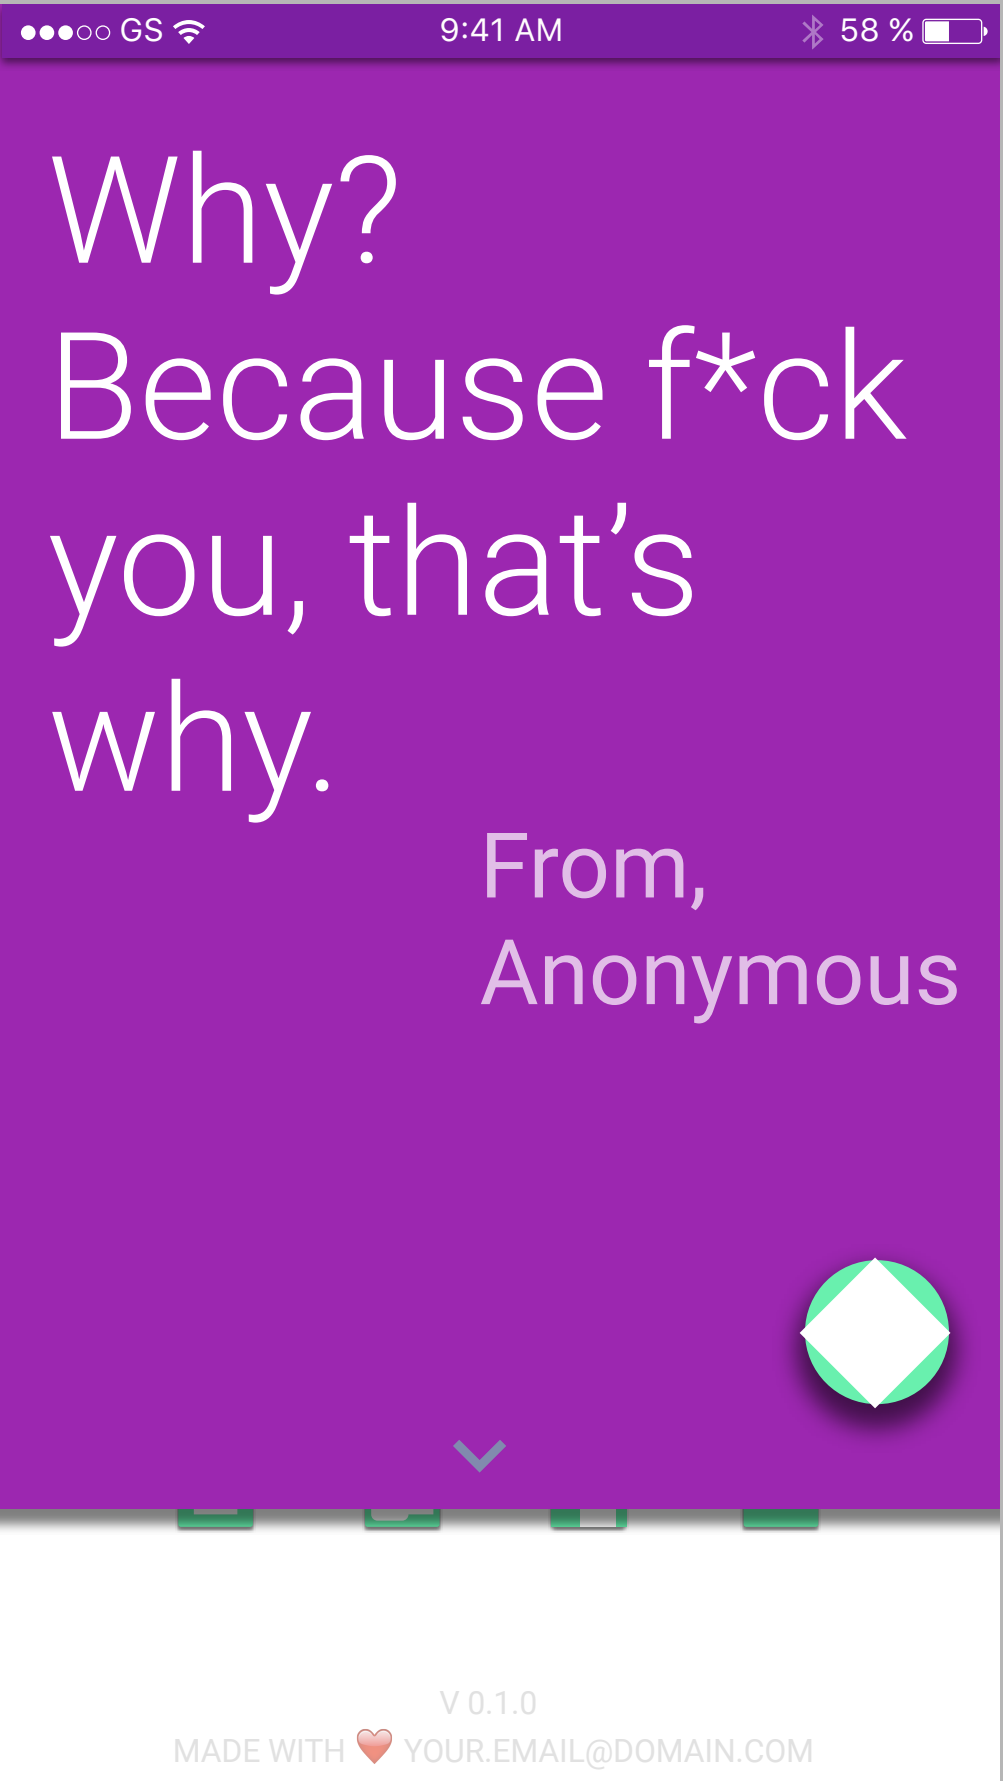

Settings Menu Visible.

Message view should be pushed up to accomodate the settings menu.

Tapping on or swiping down from the Message view should close the settings menu.

Share: To iMessage/Email, Save to Camera Roll, Facebook, Twitter, respectively.

Color Palette is switched by scrolling left/right. Colors should update right away.

Settings Menu Appearing/Dismissing

It should appear like the settings menu is directly underneath the main view.

Take note of the shadows for each element: they're suppose to convey a different distance from each other in the z-axis.

Why?

Because f*ck
you, that's
why.
