

Main Screen displays current Foaas.

Tapping on Octo icon starts a modal push to the table view.

Field of Fuc	cks	

Selecting a cell pushes to view the FoaasOperation of that name.

"Done" dismisses modal

Preview window is a text field, should allow for scrolling when keyboard appears.

Text entry bottom should be pinned to keyboard top.

Typing in text input fields should update the placeholders.

Tapping "Select" should dismiss keyboard and modal.

On dismiss, the main view should display the updated Foaas message that was just completed.

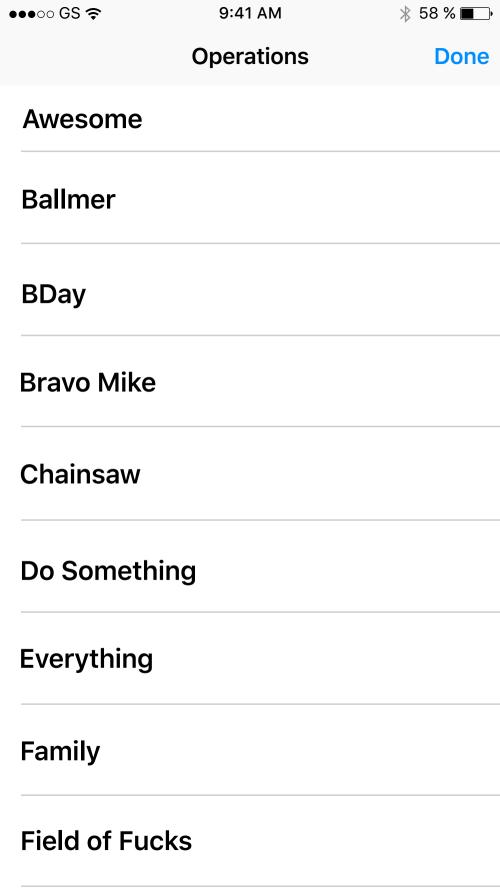

Why? Because f*ck you, that's why.
